Unit 2

You can see a pattern in these numbers. Each number has two digits. Counting in ascending order, the second digit is incremented by 1 till 9 (24, 25, 26, 27, 28, 29). If the second digit is nine (such as 29), the first digit is increased by 1 and the second digit becomes 0. The next number after 29 is 30.

The first digit is called the tens. Shows how many groups of ten are in the number.

The second digit is called unit. Shows how many units left after completing all groups of ten.
