SWITCHING ON AND OF THE COMPUTER

It is very important not to damage your computer

To switch it On just push firmly for a moment the POWER button and wait while computer starts

Before switching computer off you must check that you saved information from all working programs

Close the windows of all working programs

After finishing checks click on the Start button in Windows and select desired action (Swith computer Off, Restart, Put it in Sleep).
If you selected to switch it off, do not touch POWER button until computer goes off himself.

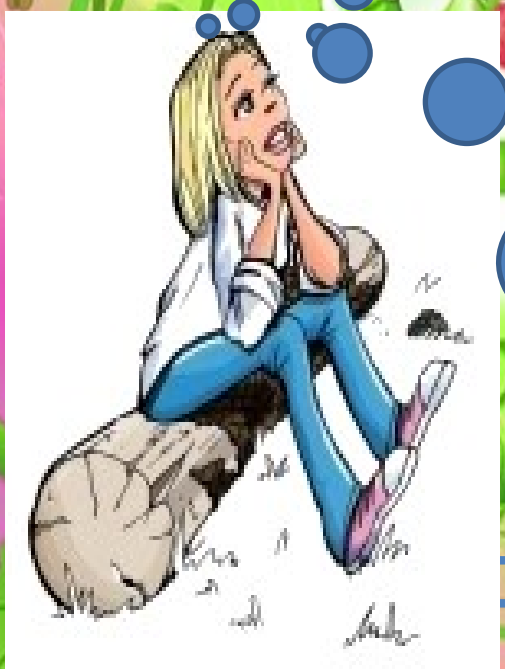
WHY DO WE SWITCH COMPUTER OFF?

Hard disk drives will work longer

Save energy

Reduce noise levels

Stop and finish internal processes of operating System correctly



RECOMMENDATIONS

BE CAREFUL IN SOCIAL NETWORKS
